

ZuPreem®

## Smart Pellets® vs. Seeds

Feed Smart Pellets™ Daily

Feed Seeds Occasionally

- ✓ Fortified with essential vitamins, minerals and amino acids seeds lack
- ✓ Lower in fat than most seeds to support cardiovascular and liver health
- ✓ Made with real whole grains from North America's Heartland
- ✓ Delicious taste in every bite combined with engaging shapes and colors
- ✓ Highly recommended by leading avian veterinarians and specialists

## THE POWER OF PELLETS

Recommended by leading avian veterinarians and specialists.

ZuPreem

- Birds on seed-based or heavy table food diets can suffer nutritional deficiencies which can ultimately lead to health problems.
- All birds, regardless of species have general requirements for major nutrients including protein, fat, carbohydrates, vitamins, and minerals.
- These nutrients are optimally delivered when premium pellets are fed.
- Pellets are nutritionally complete and specially formulated to make up at least 60% of a pet bird's daily diet.
- Avian veterinarians agree that pellets are the ideal diet for most companion birds.

## EASY START CONVERSION PLANS

Feed Smart® Easy Start Conversion Plans were created to help you convert your bird from seeds to pellets in a way that fits your lifestyle and your bird's habits. Each plan walks through conversion in a step-by-step, thorough manner, so there's no confusion, and transition is simple for both you and your bird.

### Tough Love

By moving between old food, new food, and treat incentives, your bird converts to a new pellet-based feeding plan by creating a routine he recognizes.

### Slow and Steady

Over the course of a week, your bird gradually transitions from his old food to a new pellet-based feeding plan.

### Birdie's Choice

Choose three types of pellets and let your bird select his new pellet-based feeding plan quickly and without weeks of transitioning foods.
